FUTURE TECH MINDSET

AI First Mentality: Always prioritizing intelligent automation and agentic workflows in every technical challenge.

Continuous Learning: Constantly pushing the boundaries of LLM capabilities to redefine how we interact with code.

AI VISION & OBSESSION

I am an **AI Enthusiast** and **AI Architect** building solutions through **Vibe Coding**. I orchestrate AI to execute technical visions with high speed and precision, believing that AI is the ultimate tool for innovation.

My core focus is extreme efficiency. By relying on AI as my primary coding partner, I design complex architectures and Agentic Workflows that are production-ready in record time.

AI EXPERIMENTS & PROJECTS

MultiPost (Vibe-Coded SaaS) [multipost.pro](#)
Vibe Coder & AI Architect

- **MultiPost:** Built entirely using vibe-coding methods, relying on AI for automated cross-platform content distribution.
- Implemented backend using Bun and Elysia, optimized through real-time AI prompting.
- Automated the workflow from idea to deployment solely through language model orchestration.

eslint-plugin-ai-guardrails [eslint-ai-guardrails.vercel.app](#)
Vibe Coder & Creator

- Built entirely using full vibe coding (coding with AI).
- Custom linting rules to detect AI-generated code prone to tech debt.
- Prevents monolithic files and redundant comments typically produced by AI coding tools.

CREATIVE SYNERGY & 3D

Sinergi antara visi manusia dan eksekusi AI dalam menciptakan aset visual dan fungsional cerdas.
